# **WORK EXPERIENCE**

---

## **Web Developer**

Aark InfoSoft Pvt Ltd (Oct-2024–Jan-2025)

### **Technology**

HTML,CSS,BOOTSTRAP,TAILWIND CSS,JAVASCRIPT,  
LARAWEL PHP.

### **Project Descriptions**

---

#### **Food hut**

- The Food Hut project is a dynamic and visually appealing website for a restaurant or food delivery service.
- The project is built using HTML, CSS, Bootstrap, and JavaScript, ensuring cross-platform compatibility and modern web standards.

#### **Clear Drive(<https://skysuite.ca/>)**

- The Driving License Management System is a web-based application designed to streamline and digitize the process of applying, managing, and verifying driving licenses.
- The project leverages **HTML, CSS, Bootstrap, JavaScript, and Tailwind CSS** for the front-end, while the back-end is powered by **Laravel PHP** with API integration for efficient data management and communication.

#### **Key Features:**

##### **1) User Dashboard:**

- User Registration/Login:
- Users can register and log in using secure authentication.
- Users can update personal details such as address, phone number, and email.

##### **2) Admin Panel:**

- Admins can approve or reject driving license applications.
- Manage user accounts and license information.
- View and export reports on issued, pending, and rejected licenses.

##### **3) Application Process:**

- Users can fill out multi-step application forms for driving licenses.
- Secure upload for required documents such as ID proofs, address proofs, and photographs.
- Integration with payment gateways for online fee submission.

##### **4) API Integration:**

- Integrates with government databases to validate user identity and eligibility.
- Email and SMS notifications for application status updates.

##### **5) Responsive Design:**

- The application is fully responsive and adapts seamlessly to devices of all screen sizes using Bootstrap and Tailwind CSS.

##### **6) Security Features:**

- Data encryption for sensitive user information.
- Secure API communication using token-based authentication
